## Master of Technology

Maipo Faucets are made from brass ingots of high purity, density and superior grain structure, our products follow a streamlined process in the induction casting of brass as per international standards to achieve the perfect finish. Focused on quality for manufacturing an extremely reliable product, we ensure uniform wall thickness by the process of 'core shooting' on the brass ingots before casting. This ensures the uniform flow of water inside a faucet and the ultimate sensual feel of relenishing your skin with gentle swirls.

### EASY FIX

EASY FIX is an innovative system for easy installation that is used in single-handle faucets by MAIPO. It significantly reduces the installation time.

### ADJUSTABLE DIRECTION OF WATER FLOW

The faucet aerator with an adjustable angle of water flow allows adjusting the jet angle in the range of 7 degrees in either direction.

### AERATING STREAM REGULATOR

The jet regulator that aerates the faucet aerator is equipped with a mixing mechanism that mixes the flowing water with air. This simple solution gives noticeable savings in water consumption, which can reach up to 50%.

### EASY CLEAN

The faucet aerator is equipped with EASY-CLEAN technology with an anti-scale system and a rubber finish which makes it resistant to scaling and easy to clean and maintain.

### SAVE MONEY

The faucet aerator with an adjustable angle of water flow allows adjusting the jet angle in the range of 7 degrees in either direction.

All products carry 7 years warranty against any manufacturing defects.

## About Us

Lifestyle begins at home. Your home is your aesthetic expression, unspoken yet loud, Bandhan Bath Fittings bring you warmth and vivacity to your Bathroom Uncompromising on the quality and strength.

The new collection from MAIPO is conceptualized to deliver your dreams for an urban lifestyle. It comes pre loaded with strength that outlasts even the toughest times, Manufactured at our state of the art production assembly, each taps goes through stringent ritual of the quality checks before glorifying your space.

**One look at the MAIPO home leaves the onlooker spellbound for the timeless beauty and awesome design**

*Incredible Strength Indelible Beauty*

# TECHNOLOGY

## SWIFT MOVE

Ensures a lifetime of maintenance free comfort and reliability, precise temperature adjustment. This is a good example of design and technology fusing to bring you an enhanced water experience

## STAR PLATING

Lustrous, mirror-like sheen that is soil repellent, scratch resistant and non-tarnishing, ensures a color-fast, good-as-new appearance for years to come.

## ECO CARE

Option to minimize consumption naturally integrated, consumes less water and energy.

## SOUND LESS

Extremely quiet, ensures that there is no irritating noise of water hammering.

## ZERO DRIP

All the faucets are guaranteed to be drip free.

BUILT ON THE HIGHEST  
QUALITY STANDARDS

DESIGN | QUALITY | TECHNOLOGY

All our products are designed and manufactured in-house thus ensuring strict quality control and maintaining the consistency of its product.

## CONSUMER GUIDELINES

**Maipo** belief that its products not only make a customer but a friend **Maipo** also believes that the customer must get the best out of its products and for that it has evolved some customer guidelines which if followed ensure optimum and trouble free performance with enhanced durability of **Maipo** products for years to come.

The guidelines are:

1. Use 25mm pipelines instead of 20mm to ensure better flow of water for faucets and 40mm pipelines instead of 32mm for flush valves.
2. It is recommended to place the outlet point in the overhead tank at least 4 inches above the ground level of the tank this will avoid flow of foreign particles, sand etc. into the pipeline and also please clean the tank thoroughly before the supply starts. This will minimise the risk of damage to the working parts of the faucets.
3. It is recommended that overhead tank must be cleaned regularly to avoid deposition of solid particles.
4. Please test the working of all concealed fittings installed in a high pressure before plastering or fixing of tiles.
5. Centre to centre distance of pipe fitting for hot & cold inlet for all types of wall mounted mixers should be maintained at 165mm by which any of our wall mixers can be easily installed without any problem.
6. **Please clean the aerators on the faucet outlet at a regular interval to keep the foam flow of water perfect.**
7. Please protect the finish of faucets from dirt and other damages by covering them with cloth/polypack immediately after installation till they actually used.
8. Clean the faucets regularly with wet cotton cloth to maintain the finishes for years.
9. Use chalk powder/diluted vinegar to remove scaling/stains.
10. Please do not use strong detergents, harsh cleaning agents containing abrasives and acids as this may cause damage to the chrome finish.

How to remove aerator on the faucet for cleaning

## “Miy” Maintain It Yourself

One of the major problems that the households face is the maintenance of taps. Even for a small problem you need to call a plumber and you end up feeling that the taps you purchase are too costly. But the problem will persist even with the leading brands because the water will always have dissolved particles in it and it will always clog the aerator resulting in low flow of water. **MAIPO**, a leading brand in quality taps brings you the solution. Along with technologically advanced, intelligent designs, value for money and 8 years warranty **MAIPO** brings to you “Maintain it yourself (MIY)” taps. Let’s learn how!

### LEARN HOW TO CLEAN A TAP

To keep the exterior finish of our product i.e. Chromium Plated / Coloured Surface shining for years, clean it with the help of mild soap & water. Do not use abrasive sponge or scouring agents for cleaning.

We also advise you not to use cleaning agents containing solvent or acid, lime scale removers, household vinegar and cleaning agents with acetic acid in them.

Clean Taps with a little soap and moist cloth only, then simply rinse off and wipe dry. You can avoid lime spots (White Spots) by drying the fitting each time it is used. After drying you can apply a coat of wax polish to protect the surface from settlement of water for a considerable period of time.

### LEARN HOW TO CLEAN THE AERATOR

Because of the dust, minerals and suspended particles, that comes with the water the aerator gets clogged, resulting in low flow of water. The solution is not to remove the aerator but to clean it as it helps you get streamlined and anti-splash flow of water with reduced consumption of water as well.

To clean the aerator first open the housing by unscrewing it clockwise, take out the aerator.

Wash it with water, clean it and simply attach it again. Here you go steady high flow of water. Surely you save a few bucks here.

### PRODUCT WARRANTY

PRODUCT	WARRANTY PERIOD
Faucets (Body)	7 Years
Faucets (Cartridge)	24 Months
Health Faucet	6 Months
Showers	6 Months
